CLOUD SERVICES

Owning and maintaining server and desktop infrastructure is expensive and time consuming. Ethical IT can offer your organisation a range of cost effective hosted services run from our very own 'Cloud', removing the need for your organisation to spend time, effort and money supporting and replacing ageing hardware. This service is backed up with the support of our Helpdesk Team, can be designed specifically for your requirements and could include:

- Virtual Server Hosting - using VMware virtualisation technology built on a highly resilient, high performance HP Blade environment to replace physical servers
- Hosted 'Virtual Desktop' - fully hosted solution including your own virtual Windows desktop accessible from any computer with internet access, effectively replacing your current IT systems, plus Helpdesk Support
- Physical Server Co-location - highly cost effective Tier3 secure data centre facility to host your live environment 24/7 and 365 days a year
- Disaster Recovery Co-location - run your organisation's backup systems in one of our secure server rooms across the UK. We also offer temporary office space available for staff in the event of a disaster
- Online Backup - automated backups owned and run by Ethical IT to remove the need to maintain local alternatives such as tapes and USB drives. Recovery of lost data and daily checks of data are included in the service.

For more information please call [0845 337 2989](tel:08453372989) or email enquiries@ethicalit.net

- At Ethical IT we are committed to delivering services that adhere to our Helpdesk Charter. For a detailed explanation and more information on our fair usage policy please refer to www.ethicalit.net

BACKGROUND TO ETHICAL IT

Ethical IT is the result of a formal partnership between The Ethical Property Company and JADe, working together to deliver high quality, cost effective, flexible and sustainable IT solutions to charities, social enterprises, community groups and voluntary organisations.

Our extensive experience within the social change sector means we appreciate the financial and technical limits within which organisations often work.

We therefore aim to take the stress out of the management of IT and Telephony, providing our clients with transparent and reliable support and allowing them to focus on their core operations.

A CLIENT PERSPECTIVE

Vitalise is a national charity providing short breaks (respite care) and other services for people with physical disabilities and/or visual impairments. Vitalise approached Ethical IT as they were looking to update their ageing Windows 2003 systems, and move from 2 offices into one administrative HQ in London. Ethical IT migrated the whole environment into the Cloud, including a full virtual office and databases, over a weekend.

"Ethical IT has supported us over the course of what has been a major organisational restructure, incorporating office moves, staff changes and a complete overhaul of our IT systems. They have worked with us in partnership, and delivered an IT platform that is forward thinking and flexible, less expensive to look after and always available"

- John Parker, Vitalise
